

ALOS DATA AND ITS APPLICATIONS

Kuwabara Katsuya

Remote Sensing Technology Center of Japan, Japan

Remote Sensing Technology Center of Japan, also known as “RESTEC”, is a non-profit, semi-governmental organization established in 1975 and the core organization in Satellite Remote Sensing in Japan.

More importantly, RESTEC is the master distributor of the data acquired by Japanese Satellite ALOS (Advanced Land Observing Satellite). RESTEC has the exclusive sales right of the data in Russia, Asia and Oceania.

ALOS, launched in January 2006, draws more and more attention from business users of satellite data as well as researchers. ALOS data have the best geometrical accuracy among the satellite data with similar resolution and they are offered at affordable price though SOVZOND in Russia.

Mr. Kuwabara, ALOS-PD Manager and responsible for global sale of ALOS data for RESTEC, is going to provide the Conference participants with first-hand and latest information of the satellite, its Data Products, Applications and more.
